1. Executive Summary

1.1 Purpose of This Report

This quarterly Data Catalog Statistics Dashboard provides comprehensive metrics on the adoption, usage, and value delivery of Company A's enterprise data catalog (Informatica EDC) during Q4 2024 (October 1 - December 31, 2024). The report serves multiple stakeholder audiences:

Data Governance Committee:

- Oversight of data catalog maturity and return on investment
- Identification of areas requiring governance support or resource allocation
- Monitoring progress toward NDMO Domain 2 (Data Catalog) compliance requirements

Data Management Office (DMO):

- Operational performance tracking for catalog administration
- Identification of technical issues, user pain points, and improvement opportunities
- Planning for Q1 2025 enhancements and priorities

Data Stewards:

- Understanding data asset coverage within their domains
- Monitoring metadata quality and completeness for their data assets
- Identifying popular datasets for prioritization of quality improvements

Executive Leadership:

- Demonstrating value and ROI of data catalog investment
- Evidencing progress toward data democratization and self-service analytics goals
- Supporting budget justification for continued catalog expansion

The report tracks key metrics across five dimensions:

1. Catalog Content: Data sources, assets, business terms, metadata coverage
2. User Engagement: Active users, search activity, dataset access patterns
3. Data Quality: Metadata completeness, classification, ownership
4. User Satisfaction: Survey results, feedback, support tickets

5. System Performance: Uptime, API availability, search responsiveness

1.2 Key Highlights

Company A's data catalog achieved significant growth and adoption in Q4 2024, with strong performance across all key metrics:

Content Growth:

- Total Data Sources: 58 sources (up from 54 in Q3, +7% growth)
- Total Data Assets: 4,520 assets (up from 4,120 in Q3, +10% growth)
- Business Glossary Terms: 3,890 terms (up from 3,200 in Q3, +22% growth)
- Metadata Enrichment Rate: 86% (up from 78% in Q3, +8 percentage points)

User Adoption:

- Total Registered Users: 342 users (up from 297 in Q3, +15% growth)
- Daily Active Users (DAU): 85 users on average (up from 68 in Q3, +25% growth)
- Monthly Active Users (MAU): 245 users (up from 198 in Q3, +24% growth)
- Total Searches (Q4): 6,120 searches (up from 4,850 in Q3, +26% growth)

Data Quality:

- Metadata Quality Score: 94.8% (up from 91.2% in Q3, +3.6 percentage points)
- Assets with Classification Tags: 100% (up from 94% in Q3)
- Assets with Data Owners: 100% (up from 96% in Q3)

User Satisfaction:

- Overall Satisfaction Score: 4.2/5.0 (based on 156 survey responses in Q4)
- Net Promoter Score (NPS): +42 (strong promoter sentiment)
- Support Ticket Resolution Time: 1.8 days average (down from 2.4 days in Q3)

System Performance:

- System Uptime: 99.8% (exceeding 99.5% SLA target)
- Average Search Response Time: 0.8 seconds (well below 2-second SLA)
- API Availability: 99.9%

Key Achievements in Q4:

- Successfully integrated 4 new data sources (SAP SuccessFactors, Salesforce, ServiceNow, Oracle Exadata)
- Launched automated metadata refresh for all 58 data sources (daily synchronization)
- Completed business glossary expansion project (+690 new terms)
- Achieved 100% coverage for data classification and ownership (NDMO compliance milestone)
- Exceeded Q4 user adoption target by 17% (target: 290 users, actual: 342 users)

1.3 Quarter-over-Quarter Trends

Catalog Content Growth (QoQ):

Metric	Q1 2024	Q2 2024	Q3 2024	Q4 2024	Q4 vs Q3
--------	---------	---------	---------	---------	----------

Data Sources	45	50	54	58	+7.4%
Data Assets	3,200	3,650	4,120	4,520	+9.7%
Business Terms	2,450	2,850	3,200	3,890	+21.6%
Enrichment Rate	68%	74%	78%	86%	+8 pts

User Adoption Growth (QoQ):

Metric	Q1 2024	Q2 2024	Q3 2024	Q4 2024	Q4 vs Q3
Registered Users	180	235	297	342	+15.2%
DAU	42	56	68	85	+25.0%
MAU	125	165	198	245	+23.7%
Total Searches	2,850	3,920	4,850	6,120	+26.2%

Key Observations:

- Accelerating Growth: Q4 showed accelerated growth across all metrics compared to Q3, with particularly strong growth in:
 - Business glossary terms (+22% QoQ, driven by Q4 expansion project)
 - Daily active users (+25% QoQ, driven by improved search UX and training)
 - Total searches (+26% QoQ, indicating deepening user engagement)
- Quality Improvements: Metadata enrichment rate increased from 78% to 86%, driven by:
 - Automated metadata harvesting from newly integrated SAP and Salesforce systems
 - Manual enrichment campaign led by data stewards (Q4 initiative)
 - Improved data profiling automation using Informatica IDQ
- Adoption Momentum: User adoption metrics show strong upward trajectory, with MAU increasing 24% QoQ. Key drivers:
 - Quarterly data steward forum highlighted catalog benefits (October 2024)
 - Self-service analytics training mentioned catalog prominently (November 2024)
 - Executive sponsorship from CDO promoting "data catalog first" culture

2. Catalog Content Metrics

2.1 Data Source Coverage

The data catalog integrates with 58 data sources across the organization, providing comprehensive visibility into Company A's data landscape.

Data Sources by Type:

Source Type	Count	% of Total	Examples
Relational Databases	28	48.3%	Oracle 19c (Patient DB), SQL Server (Finance), PostgreSQL (Logistics)
Cloud Applications	12	20.7%	Salesforce (CRM), SAP SuccessFactors (HR), ServiceNow (ITSM)
File Shares	8	13.8%	Network drives, SharePoint, OneDrive for Business
Data Warehouses	4	6.9%	Oracle Exadata (EDW), Azure Synapse Analytics
Big Data Platforms	3	5.2%	Hadoop HDFS, Azure Data Lake Storage
APIs & Web Services	2	3.4%	REST APIs, SOAP services
Legacy Systems	1	1.7%	Archive System X (sunset-planned)

New Data Sources Added in Q4:

Source Name	Type	Integration Date	Assets Cataloged	Notes
SAP SuccessFactors	Cloud Application	October 15, 2024	342 tables	HR data (employee records, payroll, performance)
Salesforce	Cloud Application	November 1, 2024	156 objects	CRM data (customers, opportunities, cases)
ServiceNow	Cloud Application	November 15, 2024	98 tables	ITSM data (incidents, changes, assets)
Oracle Exadata (Prod)	Data Warehouse	December 1, 2024	1,240 tables	Production EDW (clinical, financial, operational)

Data Source Coverage by Business Domain:

Business Domain	Sources	Assets	Completeness
Medical Services	12	1,580	95% (missing 1 legacy system)
Finance	10	1,020	100%
Human Resources	8	680	100%
IT Operations	7	520	90% (missing 2 monitoring tools)
Procurement	6	340	100%
Facilities	4	180	100%
Legal & Compliance	3	120	100%
Research & Innovation	3	80	75% (missing 1 research database)
Other	5	-	-

Data Source Integration Status:

Status	Count	% of Total	Notes
Fully Integrated	52	89.7%	Daily automated metadata refresh
Partially Integrated	4	6.9%	Manual metadata updates (legacy systems with limited API)
Planned for Q1 2025	8	-	New sources identified in Q4 for integration

2.2 Data Asset Inventory

The catalog contains 4,520 data assets spanning databases, tables, files, reports, and dashboards.

Data Assets by Asset Type:

Asset Type	Count	% of Total	Avg Metadata Enrichment
Database Tables	2,840	62.8%	92%
Views	680	15.0%	88%
Files (CSV, Excel, Parquet)	420	9.3%	78%
Reports (SSRS, Power BI)	340	7.5%	85%
Dashboards	120	2.7%	90%
Stored Procedures	80	1.8%	65%
APIs & Web Services	40	0.9%	70%

Top 10 Largest Data Sources by Asset Count:

Data Source	Asset Type	Asset Count	Business Owner
Oracle Patient Database	Database	1,240	Dr. Sami Al-Harbi (CMO)
Oracle Finance Database	Database	620	Ibrahim Al-Malik (CFO)
SAP SuccessFactors	Cloud App	342	Lama Al-Subaie (HR Manager)
SQL Server HR Database	Database	280	Lama Al-Subaie (HR Manager)
Salesforce CRM	Cloud App	156	Sales & Marketing
Oracle Data Warehouse	Data Warehouse	1,240	Fatima Al-Zahrani (DMO Manager)
SharePoint Document Library	File Share	340	IT Department
Power BI Report Server	Reports	280	BI Team
Procurement System	Database	180	Procurement
ServiceNow ITSM	Cloud App	98	IT Operations

Assets Added/Removed in Q4:

Activity	Count	Details
New Assets Added	400	From 4 new data source integrations (SAP, Salesfor
Assets Decommissioned	15	Sunset systems and deprecated reports
Assets Reclassified	28	Data classification level changes (reviewed in Q4
Net Growth	+385	+9.3% growth from Q3 to Q4

2.3 Business Glossary

The business glossary contains 3,890 standardized business terms, definitions, and synonyms to ensure consistent data terminology across the organization.

Business Glossary Growth:

Quarter	Terms	New Terms (QoQ)	% Growth
Q1 2024	2,450	N/A (baseline)	-
Q2 2024	2,850	+400	+16.3%
Q3 2024	3,200	+350	+12.3%
Q4 2024	3,890	+690	+21.6%

Q4 Business Glossary Expansion Project:

In Q4, DMO conducted a business glossary expansion project to improve coverage and alignment with NDMO requirements. Key activities:

- Project Duration: October 1 - December 15, 2024
- Terms Added: 690 new terms
- Data Stewards Engaged: 12 (all domains)
- Approval Workflow: Average 12 days (target: 7 days - improvement needed)
- Term Sources: Business requirements documents, policy definitions, system documentation

Business Terms by Domain:

Business Domain	Term Count	% of Total	Coverage Assessment
Medical Services	1,240	31.9%	High (comprehensive clinical terminology)
Finance	680	17.5%	High (complete financial terms)
Human Resources	520	13.4%	Medium (missing some talent acquisition terms)
IT Operations	380	9.8%	Medium (needs more technical acronyms)
Procurement	340	8.7%	High (complete vendor/contract terms)
Compliance & Legal	290	7.5%	High (regulatory terms well-defined)
Facilities	180	4.6%	Medium (needs equipment terminology expansion)
Research	120	3.1%	Low (research-specific terms limited)
Other	140	3.6%	-

Most Referenced Business Terms (Top 20):

Rank	Term	Definition Summary	References	Domain
------	------	--------------------	------------	--------

1	Patient	Individual receiving medical care	Company A	Medical
2	Diagnosis Code (ICD-10)	International Classification of Diseases code for		Medical
3	Vendor	External supplier of goods or services		Procurement
4	Employee	Person employed by Company A	Full-time, part-time	HR
5	General Ledger Account	Financial account in chart of accounts		Finance
6	Asset	Physical or digital resource owned by Company A		Finance/Facilities
7	Customer	External individual or organization receiving serv		Sales/Marketing
8	Medical Record Number (MRN)	Unique identifier for patient medical record		Medical
9	Purchase Order (PO)	Formal request to vendor for goods/services		Procurement
10	Department	Organizational unit within Company A		HR
11	Critical Data Element (CDE)	Data element essential to business operations		Data Governance
12	Data Steward	Individual accountable for data quality in specific		Data Governance
13	Personal Data	Data relating to identified or identifiable individuals		Legal/Privacy
14	Supplier Performance Rating	Score assessing vendor quality/reliability (1-5 scale)		Procurement
15	Fiscal Year	Company A's fiscal year (Jan 1 - Dec 31)		Finance
16	Data Quality Rule	Automated validation rule for data accuracy/completeness		Data Quality
17	Service Level Agreement (SLA)	Formal commitment to service delivery standards		IT/Contracts
18	Business Continuity Plan (BCP)	Plan for maintaining operations during disruption		Risk Management
19	Master Data	Core business entities (customers, patients, vendors)		Data Management
20	Data Classification	Categorization of data by sensitivity (e.g., PUBLIC, CONFIDENTIAL, SECRET)		Security

Business Glossary Quality Metrics:

Metric	Value	Target	Status
Terms with Approved Definitions	3,890 (100%)	100%	Met
Terms with Data Steward Owners	3,890 (100%)	100%	Met
Terms with Synonyms Mapped	2,820 (72.5%)	80%	Below Target
Terms Linked to Data Assets	3,120 (80.2%)	85%	Below Target
Average Approval Time	12 days	7 days	Below Target

Improvement Actions for Q1 2025:

- Streamline business glossary approval workflow from 4 sequential approvals to 3 parallel approvals (target: 7-day average)
- Conduct synonym mapping campaign with data stewards (target: 80% coverage by Q1 end)
- Implement automated linking of glossary terms to data assets using NLP/AI (pilot in January 2025)

2.4 Metadata Enrichment

Metadata enrichment measures the completeness of technical and business metadata for cataloged data assets. Higher enrichment rates enable better data discovery and understanding.

Overall Metadata Enrichment Rate: 86% (up from 78% in Q3)

Metadata Enrichment by Category:

Metadata Category	Completeness	Q3 Baseline	Improvement
Technical Metadata (schemas, data types, constraints)	95%	92%	+3%
Business Metadata (definitions, ownership, classification)	88%	78%	+10%
Operational Metadata (refresh frequency, data volume)	82%	75%	+7%
Quality Metadata (DQ scores, profiling statistics)	79%	68%	+11%

Enrichment by Data Source Type:

Source Type	Enrichment Rate	Target	Status
Cloud Applications (SAP, Salesforce, ServiceNow)	92%	90%	■ Exceeded
Relational Databases (Oracle, SQL Server, PostgreSQL)	90%	90%	■ Met
Data Warehouses (Exadata, Synapse)	88%	85%	■ Exceeded
File Shares (Network drives, SharePoint)	75%	75%	■ Met
Big Data Platforms (Hadoop, ADLS)	72%	70%	■ Exceeded
Legacy Systems (Archive System X)	45%	50%	■■ Below Target

Top 10 Most Enriched Data Assets:

Data Asset	Source	Enrichment Rate	Key Metadata
Patient Demographics Table	Oracle Patient DB	99%	Complete technical, business, quality metadata; linked to 15 reports
GL Accounts Master	Oracle Finance DB	98%	All metadata present; comprehensive lineage to 10 reports
Employee Master File	SAP SuccessFactors	97%	Business definitions, ownership, classification, quality
Vendor Registry	Procurement System	96%	Complete metadata; linked to contracts and POs
Customer 360 View	Salesforce	95%	Rich business context; linked to marketing campaigns
Clinical Diagnoses Fact	Oracle DW	94%	Complete technical metadata; linked to 28 reports
Financial Transactions Fact	Oracle DW	93%	Comprehensive lineage; linked to 12 dashboards
IT Incident Records	ServiceNow	92%	Operational metadata; SLA tracking
Lab Results Table	Oracle Patient DB	91%	Quality metadata; reference ranges documented
Procurement Transactions	Procurement System	90%	Business rules; vendor linkages

Metadata Enrichment Improvement Initiatives (Q4):

1. Automated Harvesting: Implemented automated metadata harvesting for SAP, Salesforce, ServiceNow using Informatica EDC connectors (added 340 assets with 92% avg enrichment)
2. Data Steward Enrichment Campaign: DMO conducted data steward enrichment campaign (October-November 2024):
 - Participants: 12 data stewards
 - Assets Enriched: 520 assets
 - Metadata Added: Business definitions, ownership, classification tags
 - Time Investment: 120 total hours (10 hours per steward)
3. Data Quality Profiling: Informatica IDQ automated data quality profiling for all catalog assets:
 - Assets Profiled: 4,520 (100%)
 - Quality Metrics: Completeness, uniqueness, validity, consistency
 - Refresh Frequency: Weekly

2.5 Data Lineage Coverage

Data lineage documents the flow of data from source to destination, enabling impact analysis, root cause investigation, and regulatory compliance.

Data Lineage Coverage: 78% (up from 72% in Q3)

Lineage Coverage by System Tier:

System Tier	Definition	Lineage Coverage	Target
Tier 1 (Critical)	Mission-critical systems supporting core business	95%	95%
Tier 2 (Important)	Important systems with moderate business impact	85%	85%
Tier 3 (Low Priority)	Legacy/low-usage systems sunset-planned	45%	50%

Lineage Visualization Examples:

Example 1: Patient Demographics Lineage

- Source: Oracle Patient Database → Patient_Demographics table
- Transformations: ETL (Informatica) → Data cleansing, de-duplication, enrichment
- Destination: Oracle Data Warehouse → DIM_Patient dimension
- Downstream: 28 reports, 12 dashboards
- Lineage Completeness: 100%

Example 2: Financial Transaction Lineage

- Source: Oracle Finance Database → GL_Transactions table
- Transformations: ETL (Informatica) → Currency conversion, account mapping
- Destination: Oracle Data Warehouse → FACT_Financial_Transactions
- Downstream: 15 financial reports, CFO dashboard
- Lineage Completeness: 100%

Lineage Gaps (Tier 3 Systems):

System	Lineage Status	Risk Level	Remediation Plan
Archive System X	40% (incomplete)	Low (read-only, sunset Q3 2025)	Manual lineage by Q1 2025 or accelerate sunset
Legacy HR System	50% (partial)	Low (replaced by SAP SuccessFactors)	Decommission Q2 2025
Old Finance System	45% (incomplete)	Low (replaced by Oracle Finance)	Document critical flows only

Data Lineage Use Cases (Q4):

Use Case	Frequency	Example
Impact Analysis	34 times	"What reports will break if we change this table s
Root Cause Investigation	28 times	"Why is this dashboard showing incorrect values?"
Regulatory Compliance	18 times	"Where does personal data flow for PDPL compliance
Data Migration Planning	12 times	"What downstream dependencies must we consider for
Audit Trail	8 times	"How did this value get into the executive report?"

3. User Engagement & Adoption

3.1 User Registration & Active Users

Total Registered Users: 342 (as of December 31, 2024)

User Growth:

Month	New Users	Cumulative Users	Growth Rate
October 2024	18	315	+6.1%
November 2024	15	330	+4.8%
December 2024	12	342	+3.6%
Q4 Total	+45	342	+15.2% QoQ

Active User Metrics:

Metric	Q4 2024 Average	Q3 2024 Average	Change
Daily Active Users (DAU)	85	68	+25.0%
Weekly Active Users (WAU)	165	132	+25.0%
Monthly Active Users (MAU)	245	198	+23.7%
DAU/MAU Ratio (Stickiness)	34.7%	34.3%	+0.4%

User Registration by Department:

Department	Registered Users	% of Total	Penetration Rate
IT	68	19.9%	85% (68/80 IT staff)
Finance	54	15.8%	72% (54/75 Finance staff)
Medical Services	48	14.0%	18% (48/265 clinical staff - targeted to analysts
DMO	12	3.5%	100% (12/12 DMO staff)
HR	38	11.1%	63% (38/60 HR staff)
Procurement	24	7.0%	80% (24/30 Procurement staff)
Facilities	18	5.3%	45% (18/40 Facilities staff)
Legal & Compliance	22	6.4%	88% (22/25 Legal staff)
Research	16	4.7%	53% (16/30 Research staff)
Executive Leadership	10	2.9%	100% (10/10 executives)
Other	32	9.4%	-

Penetration Rate = Registered Users / Total Staff in Department (for departments where catalog usage is expected)

User Roles:

User Role	Count	% of Total	Permissions
Viewer (read-only)	218	63.7%	Search, view metadata, no editing
Contributor (add metadata)	98	28.7%	Viewer + add comments, tag assets, suggest term de
Steward (manage domain)	12	3.5%	Contributor + approve terms, update ownership, cla
Administrator (full access)	14	4.1%	All permissions + manage users, configure integrat

3.2 Search Activity

Total Searches in Q4: 6,120 (up from 4,850 in Q3, +26.2% growth)

Search Activity by Month:

Month	Total Searches	Avg Searches/Day	Avg Searches/Active User
October 2024	2,180	70	26
November 2024	1,920	64	23
December 2024	2,020	65	24
Q4 Average	2,040/month	66/day	24/user

Search Types:

Search Type	Count	% of Total
Keyword Search (free text)	4,320	70.6%
Advanced Search (filters, facets)	1,280	20.9%
Glossary Term Lookup	420	6.9%
Lineage Navigation	100	1.6%

Top 50 Search Keywords (see Appendix B for full list)

Top 10 Most Searched Keywords:

Rank	Keyword	Searches	Category
1	Patient	842	Medical Data
2	Diagnosis	654	Medical Data
3	Vendor	521	Procurement Data
4	Employee	445	HR Data
5	Customer	398	Sales/CRM Data
6	Financial	356	Finance Data
7	Inventory	298	Inventory/Assets
8	Lab Results	276	Medical Data
9	Contract	245	Procurement/Legal
10	Department	198	Organizational Data

Search Success Metrics:

Metric	Value	Target	Status
Zero-Result Searches (search returned no results)	6.2%	<10%	■ Met
Click-Through Rate (user clicked on search result)	76.5%	>70%	■ Met
Average Results per Search	12.4 results	-	-
Avg Time to Result Click	8.2 seconds	<15 sec	■ Met

Search Refinement Patterns:

- 42% of users refined their initial search with additional keywords
- 28% of users applied filters (data source, classification, owner)
- 18% of users used autocomplete suggestions

- 12% of users clicked "related assets" or "lineage" after finding initial result

3.3 Most Accessed Datasets

Top 20 Most Accessed Datasets (Q4 2024):

Rank	Dataset Name	Data Source	Access Count	Business Owner	Use Cases
1	Patient_Demographics	Oracle Patient DB	1,280	Dr. Sami Al-Harbi (CMO)	Clinical reporting, analytics, research
2	GL_Accounts_Master	Oracle Finance DB	1,120	Ibrahim Al-Malik (CFO)	Financial reporting, budgeting
3	Employee_Master	SAP SuccessFactors	980	Lama Al-Subaie (HR)	HR analytics, headcount reporting
4	Vendor_Registry	Procurement System	840	Procurement	Vendor management, contract tracking
5	Clinical_Diagnoses	Oracle Patient DB	760	Dr. Sami Al-Harbi (CMO)	Clinical outcomes, quality metrics
6	Purchase_Orders	Procurement System	680	Procurement	Spend analysis, procurement dashboard
7	Lab_Test_Results	Oracle Patient DB	620	Dr. Sami Al-Harbi (CMO)	Lab analytics, quality monitoring
8	Financial_Transactions	Oracle Finance DB	580	Ibrahim Al-Malik (CFO)	Transaction analysis, audit trails
9	Customer_360	Salesforce	520	Sales & Marketing	CRM analytics, customer insights
10	IT_Incidents	ServiceNow	480	IT Operations	IT service management, trend analysis
11	DIM_Patient (Data Warehouse)	Oracle DW	460	DMO	BI reporting, analytics
12	Payroll_Transactions	SAP SuccessFactors	420	Lama Al-Subaie (HR)	Payroll analysis, compliance
13	Medical_Equipment_Inventory	Asset Management	380	Facilities	Asset tracking, maintenance planning
14	Contract_Repository	Document Mgmt	340	Legal	Contract management, compliance
15	FACT_Financial_Transactions (DW)	Oracle DW	320	DMO	Financial dashboards, KPIs
16	Patient_Appointments	Scheduling System	300	Medical Services	Appointment analytics, capacity planning
17	Data_Quality_Issues_Log	Informatica IDQ	280	DMO	DQ monitoring, remediation tracking
18	Building_Facilities	Facilities DB	260	Facilities	Facility management, space planning
19	Training_Completion_Records	HR Learning System	240	Lama Al-Subaie (HR)	Training compliance, skills tracking
20	Research_Publications	Research DB	220	Research Dept	Research metrics, collaboration tracking

Dataset Access Patterns:

- Clinical/Medical Data dominates top accessed datasets (5 of top 10)
- Finance & Procurement strong representation (4 of top 10)
- HR Data significant usage (3 datasets in top 20)
- Data Warehouse assets increasingly popular (2 in top 20, growing as BI adoption increases)

Access Heatmap by Day of Week:

Day	Avg Accesses	Peak Hour
Monday	340	10:00 AM

Tuesday	380	9:00 AM
Wednesday	360	2:00 PM
Thursday	320	11:00 AM
Friday	220	9:00 AM
Saturday	45	N/A (minimal activity)
Sunday	38	N/A (minimal activity)

Peak Usage: Tuesday-Thursday (accounting for 65% of weekly accesses)
Lowest Usage: Weekends (accounting for 5% of weekly accesses)

3.4 User Roles & Departments

(See Section 3.1 for detailed user registration by department and role)

Key Insights:

- IT & Finance Lead Adoption: IT (85% penetration) and Finance (72%) departments have highest catalog adoption rates, reflecting data-driven cultures and frequent data access needs
- Clinical Targeted Adoption: Medical Services has 18% penetration, but this is appropriate as catalog is targeted to analysts/researchers (not all clinical staff need catalog access)
- Executive Visibility: 100% of executive leadership registered, demonstrating commitment to data governance and setting tone from the top
- Steward Engagement: All 12 data stewards actively use catalog (100% penetration), critical for metadata enrichment and governance

4. Data Quality & Completeness

4.1 Metadata Quality Score

Overall Metadata Quality Score: 94.8% (up from 91.2% in Q3)

The metadata quality score is a composite metric measuring:

1. Completeness (40% weight): % of required metadata fields populated
2. Accuracy (30% weight): % of metadata validated as correct
3. Consistency (20% weight): % of metadata following standards
4. Timeliness (10% weight): % of metadata refreshed within SLA

Metadata Quality Score by Dimension:

Dimension	Score	Weight	Weighted Score
Completeness	96%	40%	38.4%

Accuracy	95%	30%	28.5%
Consistency	92%	20%	18.4%
Timeliness	94%	10%	9.4%
Total Quality Score	-	100%	94.8%

Metadata Quality Trends:

Quarter	Quality Score	QoQ Change
Q1 2024	85.2%	N/A (baseline)
Q2 2024	88.6%	+3.4%
Q3 2024	91.2%	+2.6%
Q4 2024	94.8%	+3.6%

Quality Improvement Drivers:

- Automated metadata harvesting for new cloud app integrations (SAP, Salesforce, ServiceNow)
- Data steward enrichment campaign (520 assets enriched)
- Enhanced data profiling with Informatica IDQ

4.2 Data Asset Classification

Data Classification Completeness: 100% (up from 94% in Q3)

All 4,520 cataloged data assets now have data classification tags (SECRET, CONFIDENTIAL, INTERNAL, PUBLIC) as required by NDMO Domain 7.

Classification Distribution:

Classification Level	Asset Count	% of Total	Definition
SECRET	720	15.9%	Highly sensitive (patient medical records, employee
CONFIDENTIAL	2,170	48.0%	Business-sensitive (vendor contracts, financial tr
INTERNAL	1,180	26.1%	Internal-use only (org charts, internal reports, p
PUBLIC	450	10.0%	Publicly disclosable (clinic locations, public rep

Classification by Business Domain:

Domain	SECRET	CONFIDENTIAL	INTERNAL	PUBLIC
Medical Services	680 (43%)	620 (39%)	240 (15%)	40 (3%)
Finance	20 (2%)	740 (73%)	220 (22%)	40 (4%)
HR	12 (2%)	520 (76%)	140 (21%)	8 (1%)

IT Operations	0 (0%)	180 (35%)	320 (62%)	20 (4%)
Procurement	0 (0%)	280 (82%)	60 (18%)	0 (0%)
Legal	8 (7%)	80 (67%)	30 (25%)	2 (2%)
Other	0 (0%)	-	-	340 (76%)

Classification Changes in Q4:

Activity	Count	Notes
Assets Reclassified	28	Q4 classification audit identified over-classifica
New Assets Classified	400	All new assets from Q4 data source integrations
Audit Trail Logging	100%	All classification changes now logged in Colibra

4.3 Data Owner Assignment

Data Owner Completeness: 100% (up from 96% in Q3)

All 4,520 cataloged data assets now have assigned data owners as required by NDMO Domain 1 (Data Governance).

Data Owners by Type:

Owner Type	Asset Count	% of Total
Data Stewards (12 domain stewards)	3,240	71.7%
Business Unit Leaders (department heads)	980	21.7%
IT/System Owners (technical owners)	300	6.6%

Top 10 Data Owners by Asset Count:

Data Owner	Role	Assets Owned	Business Domain
Dr. Sami Al-Harbi	Chief Medical Officer	1,580	Medical Services
Ibrahim Al-Malik	Chief Financial Officer	1,020	Finance
Lama Al-Subaie	HR Manager	680	Human Resources
IT Operations Team	IT Ops Manager	520	IT Operations
Procurement Team	Procurement Director	340	Procurement
Facilities Team	Facilities Director	180	Facilities
Legal Team	General Counsel	120	Legal & Compliance
Research Team	Research Director	80	Research & Innovation
Fatima Al-Zahrani	DMO Manager	40	Data Warehouse (DMO-owned)

Other	Various	-	-
-------	---------	---	---

Data Owner Engagement:

Metric	Value	Notes
Owners Actively Managing Assets	87%	Owners who logged into catalog in Q4 and updated m
Avg Assets per Owner	12	Reasonable span of control
Ownership Transfer Requests	8	Ownership changes due to org restructuring

4.4 Catalog Refresh Status

Automated Daily Refresh: 100% of 58 data sources configured for daily automated metadata refresh

Refresh Status:

Refresh Frequency	Sources	Assets	Status
Daily (Automated)	52	4,340	■ On schedule
Weekly (Manual)	4	120	■ On schedule
Monthly (Manual)	2	60	■ On schedule

Refresh Success Rate: 99.2% (Q4 average)

Refresh Failures in Q4:

Source	Failure Date	Root Cause	Resolution
Archive System X	Nov 12	API timeout (legacy system slow)	Increased timeout threshold; refresh succeeded on
Legacy HR System	Dec 5	Network connectivity issue	Restored network connectivity; refresh succeeded

5. Business Glossary Metrics

(See Section 2.3 for comprehensive business glossary statistics)

6. User Satisfaction & Feedback

6.1 Survey Results

DMO conducted a user satisfaction survey in December 2024 to gather feedback on catalog usability, value, and areas for improvement.

Survey Participation:

- Survey Period: December 1-15, 2024
- Respondents: 156 users (out of 342 registered users, 45.6% response rate)
- Methodology: 10-question online survey distributed via email

Overall Satisfaction Score: 4.2/5.0

Question-by-Question Results:

Question	Avg Rating (1-5)	% Satisfied (4-5)
1. Overall catalog satisfaction	4.2	82%
2. Search is fast and intuitive	4.5	90%
3. Metadata is comprehensive and accurate	4.0	75%
4. Lineage visualization is excellent	4.6	93%
5. Business glossary is helpful	4.1	78%
6. Data classification is clear	4.3	85%
7. Access request process is smooth	3.8	68%
8. Catalog helps me find data faster	4.4	88%
9. I would recommend catalog to colleagues	4.3	84%
10. Catalog training was effective	4.2	80%

Net Promoter Score (NPS): +42

- Promoters (9-10 rating): 58%
- Passives (7-8 rating): 26%
- Detractors (0-6 rating): 16%

NPS = % Promoters - % Detractors = 58% - 16% = +42 (Strong positive sentiment)

Key Strengths (from survey):

- Search is fast and intuitive (4.5/5.0, 90% satisfied)
- Lineage visualization is excellent (4.6/5.0, 93% satisfied)
- Catalog helps me find data faster (4.4/5.0, 88% satisfied)

Improvement Opportunities (from survey):

- Access request process is smooth (3.8/5.0, only 68% satisfied)
- Metadata is comprehensive and accurate (4.0/5.0, 75% satisfied - opportunity to reach 85%+)

6.2 User Comments & Feature Requests

Survey Verbatim Comments (see Appendix C for full list)

Top Positive Comments:

- 1. "Search is so much faster than asking IT for data location - saves hours!" (Finance Analyst)
- 2. "Lineage view is amazing - finally understand where our reports get their data" (BI Developer)
- 3. "Business glossary clarified confusing terms - great for new employees" (HR Analyst)
- 4. "Catalog has become my go-to tool for data discovery" (Data Analyst)
- 5. "Love the data quality scores - helps me know which datasets to trust" (Research Scientist)

Top Improvement Requests:

Feature Request	Count	Priority	Planned Action
Faster access approval process	28	HIGH	Implement automated approval for INTERNAL-classified data
Enhanced API documentation	18	MEDIUM	Add more code examples & tutorials to API docs (Q1 2025)
Mobile app	15	LOW	Assess feasibility, likely defer to 2026
Data profiling statistics	12	HIGH	Already available but not well-known - create training materials
Export search results to Excel	10	MEDIUM	Implement in Q2 2025
Saved searches/bookmarks	8	MEDIUM	Implement in Q2 2025
Email alerts for dataset changes	6	LOW	Assess feasibility for Q2 2025
Better integration with Power BI	5	MEDIUM	Explore Power BI catalog connector (Q2 2025)

6.3 Support Ticket Analysis

Total Support Tickets in Q4: 42 (down from 56 in Q3, -25%)

Ticket Category Breakdown:

Category	Count	% of Total	Avg Resolution Time
Access Request (cannot access dataset)	18	42.9%	2.1 days
Search Issue (cannot find data)	10	23.8%	0.8 days
Metadata Error (incorrect metadata)	8	19.0%	1.5 days
Training Request (how to use feature)	4	9.5%	0.5 days
Bug Report (system malfunction)	2	4.8%	3.2 days

Average Resolution Time: 1.8 days (down from 2.4 days in Q3, -25% improvement)

Support Ticket Trends:

- Declining Volume: Support tickets decreased 25% QoQ, indicating improved usability and user proficiency
- Access Requests Dominate: 43% of tickets related to access requests, highlighting opportunity to streamline access approval workflow
- Fast Resolution: Average 1.8-day resolution time well below 3-day SLA target

7. System Performance & Availability

7.1 System Uptime

System Uptime: 99.8% (exceeding 99.5% SLA target)

Monthly Uptime:

Month	Uptime	Downtime (minutes)	Incidents
October 2024	99.9%	45 minutes	1 (planned maintenance)
November 2024	99.7%	130 minutes	2 (1 planned, 1 unplanned)
December 2024	99.8%	90 minutes	1 (planned maintenance)
Q4 Average	99.8%	88 min/month	1.3/month

Downtime Analysis:

Incident Date	Type	Duration	Root Cause	Impact
Oct 15	Planned Maintenance	45 min	Informatica EDC upgrade	Scheduled during off-hours, minimal user impact
Nov 8	Unplanned Outage	85 min	Database connection pool exhausted	Fixed by restarting application server
Nov 22	Planned Maintenance	45 min	Security patch deployment	Scheduled during off-hours
Dec 12	Planned Maintenance	90 min	Data source connector updates (SAP, Salesforce)	Scheduled during off-hours

Availability SLA Compliance: 100% (all months exceeded 99.5% target)

7.2 API Performance

API Availability: 99.9%

API Usage in Q4:

- Total API Requests: 2.4 million
- Average Requests/Day: 26,087
- Peak Requests/Day: 42,150 (November 15 during BI report refresh cycle)

API Response Time:

Metric	Value	SLA Target	Status
Average Response Time	0.3 seconds	<1.0 sec	■ Met
95th Percentile Response Time	0.7 seconds	<2.0 sec	■ Met
99th Percentile Response Time	1.2 seconds	<3.0 sec	■ Met

Top API Endpoints by Usage:

Endpoint	Requests	% of Total	Use Case
/api/v1/search	1,200,000	50.0%	Programmatic search queries
/api/v1/assets/{id}	480,000	20.0%	Retrieve asset metadata
/api/v1/lineage/{id}	360,000	15.0%	Retrieve data lineage
/api/v1/glossary/terms	240,000	10.0%	Business glossary lookup
Other endpoints	120,000	5.0%	-

API Consumers:

Consumer	Requests	Use Case
Power BI (BI reporting tool)	960,000	Automatic metadata tagging for BI reports
Informatica IDQ (DQ tool)	480,000	Data quality rule validation
Custom Analytics Scripts	720,000	Data discovery for analytics projects
Other Applications	240,000	-

7.3 Search Response Times

Average Search Response Time: 0.8 seconds (well below 2-second SLA)

Search Performance by Complexity:

Search Type	Avg Response Time	SLA Target	Status
Simple Keyword Search	0.6 seconds	<1.5 sec	■ Met
Advanced Search (with filters)	1.1 seconds	<2.5 sec	■ Met
Glossary Term Lookup	0.4 seconds	<1.0 sec	■ Met
Lineage Visualization	1.8 seconds	<3.0 sec	■ Met

Search Response Time Trend:

Month	Avg Response Time	95th Percentile
October 2024	0.9 seconds	1.6 seconds
November 2024	0.8 seconds	1.5 seconds
December 2024	0.7 seconds	1.4 seconds
Q4 Trend	Improving	Improving

Performance Improvement Drivers:

- Elasticsearch index optimization (November 2024)
- Database query tuning (December 2024)
- Increased server memory allocation (October 2024)

8. Quarterly Improvements & Initiatives

8.1 New Features Implemented

Q4 Feature Releases:

1. Automated Data Classification (October 2024)

- Feature: AI-powered data classification recommendations based on column names and data patterns
- Impact: Reduced manual classification effort by 60%, improved classification accuracy
- Adoption: 85% of data stewards using feature

2. Enhanced Lineage Visualization (November 2024)

- Feature: Interactive, graphical lineage view with zoom/filter capabilities
- Impact: User satisfaction with lineage increased from 4.2 to 4.6 (survey results)
- Adoption: 93% of users rated lineage visualization as "excellent"

3. Saved Searches & Bookmarks (December 2024)

- Feature: Users can save frequently-used searches and bookmark favorite datasets
- Impact: Improved user productivity, reduced repeat searches
- Adoption: 42% of active users created saved searches in first 2 weeks

4. Data Quality Dashboard (December 2024)

- Feature: Visual dashboard showing data quality scores, trends, and issue summary
- Impact: Improved visibility of DQ metrics for data stewards and executive leadership
- Adoption: 28 users accessed dashboard in first week

8.2 Integration Enhancements

Q4 Data Source Integrations:

1. SAP SuccessFactors (October 15, 2024)

- Assets Added: 342 tables (employee records, payroll, performance, recruiting)
- Integration Method: Informatica EDC connector with daily automated refresh
- Business Value: Complete HR data visibility, supporting workforce analytics

2. Salesforce CRM (November 1, 2024)

- Assets Added: 156 objects (accounts, contacts, opportunities, cases)
- Integration Method: Informatica EDC Salesforce connector
- Business Value: Customer 360 visibility, CRM analytics enablement

3. ServiceNow ITSM (November 15, 2024)

- Assets Added: 98 tables (incidents, changes, problems, assets)
- Integration Method: ServiceNow REST API integration
- Business Value: IT service management analytics, SLA monitoring

4. Oracle Exadata (Production DW) (December 1, 2024)

- Assets Added: 1,240 tables (clinical, financial, operational data)
- Integration Method: Oracle database connector with daily refresh
- Business Value: Complete data warehouse visibility, supporting all BI reporting

Planned Q1 2025 Integrations:

- Veeam Backup & Recovery (backup metadata)
- CrowdStrike Endpoint Security (security logs)
- Archer GRC (governance, risk, compliance data)
- Azure Data Lake Storage (big data platform)

8.3 Training & Onboarding

Q4 Training Activities:

1. Monthly Catalog User Training Sessions

- Participants: 68 users across 3 sessions (October, November, December)
- Duration: 1-hour hands-on training
- Topics: Search tips, business glossary, data lineage, saved searches
- Satisfaction: 4.2/5.0 average rating

2. Data Steward Bootcamp (November 2024)

- Participants: 3 newly appointed data stewards
- Duration: 8-hour intensive course
- Topics: Metadata management, classification, ownership, quality monitoring
- Certification: All 3 participants certified (remediated audit finding)

3. Executive Briefing on Catalog ROI (December 2024)

- Participants: 10 executive leaders
- Duration: 30-minute presentation by CDO
- Topics: Catalog adoption metrics, business value, 2025 roadmap
- Outcome: Secured budget approval for Q1 2025 enhancements

4. Self-Paced E-Learning Module (launched December 2024)

- Platform: Company A Learning Management System
- Duration: 20-minute interactive module
- Topics: Catalog basics, search, glossary
- Enrollment: 45 users in first 2 weeks

Training Effectiveness:

Metric	Value	Target	Status
--------	-------	--------	--------

Training Completion Rate	96%	95%	■ Exceeded
Training Satisfaction	4.2/5.0	4.0/5.0	■ Exceeded
Post-Training Catalog Usage	+35% increase	+20%	■ Exceeded

9. Challenges & Remediation Actions

9.1 Legacy System Integration Challenges

Challenge:

Integrating legacy systems (Archive System X, Legacy HR System, Old Finance System) with limited API capabilities and incomplete documentation.

Impact:

- Metadata enrichment for legacy systems only 45% (vs. 90%+ for modern systems)
- Manual effort required for metadata capture
- Data lineage gaps for Tier 3 systems

Remediation Actions:

1. Short-Term: Manual metadata cataloging for 15 most-accessed legacy tables (Q1 2025)
2. Medium-Term: Accelerate legacy system sunset from Q3 2025 to Q2 2025 where feasible
3. Long-Term: Data migration from legacy systems to modern data warehouse, eliminating integration needs

Status: In progress, on track for Q1 2025 manual cataloging milestone

9.2 Metadata Quality Issues

Challenge:

Some data assets have incomplete or inaccurate metadata despite 94.8% overall quality score.

Specific Issues:

- 20% of assets missing synonym mappings (target: 80% coverage)
- 15% of assets not linked to business glossary terms (target: 85% linkage)
- Metadata accuracy challenges for complex ETL transformations

Remediation Actions:

1. Synonym Mapping Campaign (Q1 2025): Data stewards to map synonyms for 600+ terms
2. NLP-Powered Auto-Linking (Q1 2025): Pilot AI/NLP tool to automatically link assets to glossary terms
3. ETL Documentation Standards (Q1 2025): Establish standards for documenting transformation logic in Informatica

Status: Planned for Q1 2025 execution

9.3 User Adoption Barriers

Challenge:

Some departments (Facilities 45%, Research 53%) have lower catalog penetration than target (75%).

Root Causes:

- Lack of awareness of catalog capabilities
- Perception that catalog is "only for IT and data teams"
- Limited training availability for operational staff

Remediation Actions:

1. Targeted Outreach: DMO to conduct department-specific catalog demos for Facilities (January 2025) and Research (February 2025)
2. Use Case Showcase: Develop department-specific use case examples demonstrating catalog value (e.g., asset management for Facilities, publication tracking for Research)
3. Expanded Training: Offer training sessions at multiple time slots to accommodate shift workers

Status: Planned for Q1 2025 execution

10. Q1 2025 Roadmap & Recommendations

10.1 Short-Term Priorities (Q1 2025)

1. Access Request Process Improvement (Priority: HIGH)

- Objective: Reduce access request approval time from 2.1 days to <1 day
- Approach: Implement automated approval for INTERNAL-classified datasets (68% of total)
- Owner: DMO & IT Security
- Target Date: February 28, 2025

2. Synonym Mapping Campaign (Priority: HIGH)

- Objective: Increase synonym coverage from 72.5% to 80%
- Approach: Data stewards map synonyms for 600+ glossary terms
- Owner: DMO & Data Stewards
- Target Date: March 31, 2025

3. API Documentation Enhancement (Priority: MEDIUM)

- Objective: Improve API documentation with more examples and tutorials
- Approach: Add 20+ code examples, create video tutorials, publish API cookbook
- Owner: DMO Data Catalog Administrator
- Target Date: February 15, 2025

4. Targeted Department Adoption (Priority: MEDIUM)

- Objective: Increase Facilities penetration from 45% to 65%, Research from 53% to 70%
- Approach: Department-specific demos, use case development, targeted training
- Owner: DMO Manager
- Target Date: March 31, 2025

5. Legacy System Metadata Cataloging (Priority: LOW)

- Objective: Catalog 15 most-accessed tables in Archive System X
- Approach: Manual reverse-engineering and documentation
- Owner: DMO Data Catalog Administrator
- Target Date: March 31, 2025 (or sunset system earlier)

10.2 Medium-Term Initiatives (H1 2025)

Q2 2025 Initiatives:

1. Export & Saved Search Features (April-May 2025)
 - Export search results to Excel/CSV
 - Enhanced saved searches with sharing capabilities
2. NLP-Powered Auto-Linking (April-June 2025)
 - Pilot AI/NLP tool to automatically link assets to glossary terms
 - Target: 85% asset-to-term linkage
3. Power BI Integration Enhancement (May-June 2025)
 - Explore Power BI catalog connector for seamless integration
 - Automatic metadata tagging for Power BI reports
4. Business Glossary Workflow Streamlining (April 2025)
 - Reduce term approval time from 12 days to 7 days
 - Implement parallel approvals vs. sequential
5. Legacy System Sunset (Q2 2025)
 - Accelerate Archive System X sunset from Q3 to Q2 2025
 - Decommission Legacy HR System and Old Finance System

10.3 Long-Term Vision (2025-2026)

Strategic Initiatives:

1. Data Marketplace (Q3-Q4 2025)
 - Transform catalog into data marketplace with self-service data products
 - Enable users to "shop" for curated, governed datasets
 - Implement data product metadata (SLAs, quality guarantees, usage examples)
2. AI-Powered Data Discovery (Q4 2025-Q1 2026)
 - Implement natural language search ("Show me all patient data from 2023")
 - AI recommendations based on user role and search history
 - Predictive suggestions for related datasets
3. Mobile App (2026)
 - Develop iOS/Android mobile app for on-the-go data discovery
 - Push notifications for dataset changes, quality alerts
4. Advanced Analytics on Catalog Usage (Q3 2025)

- Implement analytics on catalog usage patterns to inform governance priorities
- Identify unused datasets for archival/decommissioning
- Optimize catalog based on user behavior analysis

5. Federated Catalog (2026)

- Expand catalog to federate with partner organizations (e.g., Ministry of Health)
- Enable cross-organizational data discovery for approved use cases

Appendices

Appendix A: Data Source Inventory

(List of all 58 data sources with technical details)

Appendix B: Top 50 Most Searched Terms

(Full list of most searched keywords with search counts)

Appendix C: User Survey Verbatim Comments

(All open-text comments from user satisfaction survey)

Appendix D: Glossary of Terms

DAU (Daily Active Users): Number of unique users who access the catalog on a given day

MAU (Monthly Active Users): Number of unique users who access the catalog at least once in a given month

Metadata Enrichment: The percentage of metadata fields populated for a data asset (higher = more complete)

Data Lineage: Documentation of the flow of data from source to destination, including transformations

Business Glossary: Centralized repository of standardized business terms and definitions

Data Steward: Individual accountable for data quality and governance in a specific business domain

Critical Data Element (CDE): Data element essential to business operations and subject to heightened quality controls

SLA (Service Level Agreement): Formal commitment to service delivery standards (e.g., 99.5% uptime)

NPS (Net Promoter Score): Metric measuring customer loyalty (-100 to +100, >0 is positive)
